**DETAILED ACTION**

1. Applicants' response to the office action and filed on February 18, 2005 have been entered.
2. The declaration under 37 CFR 1.131 and the exhibits submitted on February 18, 2005 have been entered and considered.
3. The arguments with regard to the rejection under 35 USC 103(a) made in the previous office action, are considered and the rejection is withdrawn herein in view of the declaration under 37 CFR 1.131.
3. The following is an examiner's statement of reasons for allowance:

Claims 1-7 are allowed.

The present invention is drawn to a method for generating a polynucleotide sequence or population of sequences from parent single stranded polynucleotide sequences encoding one or more protein motifs. The closest prior art (Thill et al., US 6,632,610) ('610) teach in vitro recombination of single-stranded polynucleotides and did not teach or suggest digesting single-stranded polynucleotides using an exonuclease. The declaration further supports that the applicants are in possession of the instant invention before the effective filing date of '610.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
